

About Us

Join the Mindera Health team! We're creating a precision and personalized diagnostic platform for patients, physicians, and payers to more effectively achieve therapeutic benefits for skin diseases faster and at a lower cost. Mindera Health is commercializing scalable non-invasive biomarker extraction technology and data analytics to profile over 7,000 biomarkers per sample collected through a patented non-invasive dermal biomarker patch. Combining Machine Learning with high-throughput Next-Generation Sequencing is the foundation for a new era of Dermal Intelligence™ – actionable information for payers, providers, and patients to improve health outcomes and reduce healthcare spending.

The company's flagship test, Mind.Px™, provides a treatment algorithm to prospectively predict a patient's response to expensive psoriasis biologic drugs.

Mindera won the prestigious 2020 MedTech Award for Most Innovative Dermatology company. We are located in San Diego, CA. Find out more about us at minderahealth.com.

We are looking for a Medical Science Liaison

This full-time position will be eligible for a comprehensive and valuable benefit program, including 100% paid medical, dental, and vision premiums for employees, 15 days PTO, 12 holidays, flexible spending accounts, and up to a 4% 401K match! In addition, team members may be eligible to participate in an annual bonus plan tied to company and individual performance, or an incentive plan. We also offer a long-term incentive plan to align company and colleague success over time.

Mindera is based in San Diego, California. This position will be primarily focused in the Western United States. Preferred candidates would reside in San Diego and work in person at the office, when not traveling.

Position Overview

The Medical Science Liaison (MSL) plays a critical role in educating physicians, medical directors, and other healthcare professionals by providing in-depth scientific and medical expertise on our flagship product, Mind.Px.

Here's a little more about the position responsibilities

This position requires a strong background in the medical field, exceptional communication skills, and the ability to establish strong relationships with key opinion leaders and healthcare stakeholders. Responsibilities include:

- Develop an expert understanding of the scientific foundations and clinical application of Mind.Px.
- Stay up-to-date with scientific literature, clinical trials, and developments in the relevant therapeutic area.

- Act as a resource for internal teams, providing accurate and up-to-date information on the product.
- Establish and maintain relationships with key opinion leaders and healthcare professionals.
- Conduct in-depth scientific discussions with KOLs, physicians, and other healthcare stakeholders.
- Deliver high-quality scientific presentations, training sessions and educational programs to healthcare professionals.
- Address scientific inquiries and provide timely, accurate, and balanced responses.
- Provide scientific input and review for promotional and educational materials.
- Contribute to the development of scientific presentations, posters, and publications for conferences and meetings.
- Collaborate with cross-functional teams to support the commercialization of Mind.Px.
- Attend conferences and events to represent Mindera Health and stay informed about the latest research and trends.
- Ensure compliance with applicable legal, regulatory, and company standards, including adherence to relevant guidelines and policies.
- Maintain thorough and accurate records of interactions and activities in accordance with company procedures and regulatory requirements.

We are looking for candidates with the following education and experience

- Ph.D. in a relevant scientific or medical discipline.
- 3+ years of successful work experience in the dermatology area (medical), preferably experience with biologic based conditions.
- Proven ability to establish and maintain relationships with KOLs and healthcare professionals.
- Excellent communication and presentation skills with the ability to effectively convey complex scientific information to diverse audiences.
- Strong scientific and clinical knowledge in in the pharmaceutical, biotechnology, or healthcare industry.
- Strong analytical and problem-solving skills, with the ability to critically evaluate scientific literature and clinical data.
- Self-motivated, proactive, and able to work independently.
- Ability to travel as required to meet business needs (up to 40%)

If you believe you can help achieve a greater purpose with passionate, high-performing, and talented people, then we want to hear from you. Please send your resume to careers@mimderahealth.com.
