

# Over 50% of people treated for psoriasis will try more than one biologic medication

Why? Because each patient's response is due to several individual factors—one treatment does not fit all.

Mind.Px, a dermal biomarker patch, painlessly collects your genomic information to predict your response to biologic medications so you can be on the best biologic for your body.

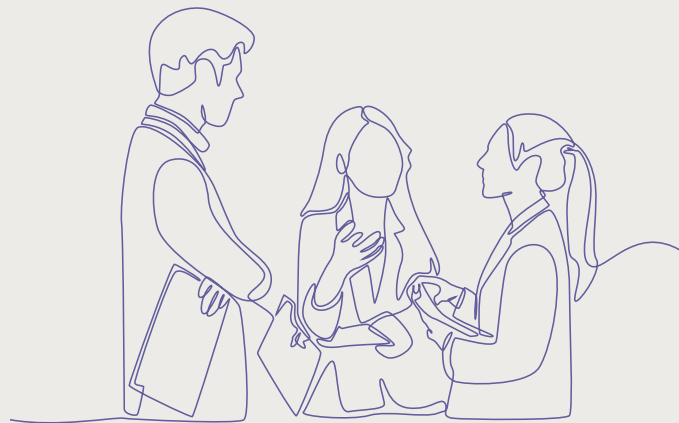

## Simply follow 3 steps:

1. **Ask your doctor to order Mind.Px**
2. **Have your sample collected**
3. **Discuss the results with your doctor**

## Patients had better outcomes with Mind.Px

One study showed when a patient's biologic treatment choice was informed by the Mind.Px test results, disease improvement was achieved faster versus patients whose physicians did not receive the Mind.Px test results.

## Find the biologic that is right for your psoriasis

It's quick and painless  
with Mind.Px

## 1. Ask your doctor to order Mind.Px™

- If you have psoriasis and you are prescribed a biologic therapy or may be starting a biologic therapy soon, your doctor can order the Mind.Px test by visiting [minderhealth.com/](http://minderhealth.com/) or scanning the QR code on the back of this brochure
- Mindera Health will work directly with your health insurance provider to coordinate payment for Mind.Px
- If you have a financial responsibility and/or a financial hardship, you may be eligible for the Mindera Health Patient Financial Assistance Program. For more information, please call or email Mindera Health Customer Services at (844) 713-1488 or [fap@minderhealth.com](mailto:fap@minderhealth.com)

## 2. Have your sample collected

- It takes only 5 minutes to collect your sample with the Mind.Px applicator
  - › The dermal biomarker patch will be applied to an area of plaque on your skin
  - › It is painless, and after only 5 minutes, the patch will be removed and sent to Mindera Health for analysis
- Your doctor can either collect the sample in the office or a trained Mindera Health representative can collect your sample outside the office—your doctor will tell you which option they prefer

## 3. Discuss the results with your doctor

- An easy-to-read report is sent directly to your physician's office 2 weeks after the sample is received, showing your test results and the class of biologic medications that is best suited for you

### Biologic classes and medications included in the Mind.Px report:

- **TNF $\alpha$ i:** inhibits the activation of tumor necrosis factor alpha
  - › **Cimzia**® certolizumab pegol
  - › **Humira**® adalimumab
- **IL-17i:** inhibits the activation of interleukin 17
  - › **Cosentyx**® secukinumab
  - › **Siliq**® brodalumab
  - › **Taltz**® ixekizumab
- **IL-23i:** inhibits the activation of interleukin 23
  - › **Ilumya**® tildrakizumab
  - › **Skyrizi**® risankizumab
  - › **Tremfya**® guselkumab
